ETLCO COMPANY

Welcome to **Environmental
Testing and Laboratories Company**

ETLCO is a leading provider of comprehensive environmental solutions, offering cutting-edge testing, analysis, and consultancy services. With a commitment to sustainability and regulator compliance, we help industries and organizations to minimize their environmental impact while ensuring the highest standards of quality and safety.

INTRODUCTION

At **ETLCO**, we are dedicated to delivering reliable and Innovative environmental solutions that support Businesses in maintaining compliance, improving Efficiency, and fostering a greener future.

OIL AND GAS LABORATORY

AIR QUALITY MONITORING AND TESTING SERVICES

Improving the Environmental Quality in **KSA**
By providing the best environmental services.

ETLCO VISION

At Environmental Testing and Laboratories Company (ETLCO), our vision as a regional leader in environmental solutions, setting the standard for innovation, reliability, and sustainability in environmental testing, consultancy, and compliance.

ETLCO MISSION

At Environmental Testing and Laboratories Company (ETLCO), our Mission is to provide reliable, accurate, and innovative environmental solutions that support industries in achieving Sustainability, regulatory compliance, and operational excellence.

ETLCO COMMITMENT

✓ Delivering High-Quality Testing & Analysis

Utilizing advanced technology and internationally Recognized methodologies to ensure precise and Dependable environmental data.

✓ Enhancing Environmental Compliance

Assisting businesses in navigating complex environmental regulations through expert consultancy and tailored Solutions.

✓ Promoting Sustainability & Public Health

Supporting industries in reducing their environmental footprint while safeguarding natural resources and Community well-being.

✓ Driving Innovation & Continuous Improvement

Investing in research, development, and training to stay at the forefront of environmental science and testing Solutions.

شركة دوائر
Environmental Testing and Laboratories Company

ETLCO GOALS

-  Lead the industry in environmental excellence by providing cutting-edge testing and consultancy services that drive sustainability and regulatory compliance.
-  Advance scientific innovation through continuous research, investment in technology, and the development of new methodologies in environmental analysis.
-  Be the trusted partner for industries, government agencies, and communities, supporting their commitment to environmental responsibility and sustainable growth.
-  Foster a cleaner and healthier future by helping businesses minimize their environmental footprint and contribute to global sustainability initiatives.

CORE VALUES

TRUST

INTEGRITY

TEAM WORK

CONFIDENCE

TRANSPARENCY

WHY ETLCO?

- ≡ **More than a decade old experience** and expertise.
- ≡ **Experienced and well-trained staff** in Environmental Services.
- ≡ **One of the biggest fleets of mobile laboratories in KSA** to meet our Client's Schedule and Regulatory Requirement.
- ≡ **National & International** industry expert and Organizations to support our projects.
- ≡ **Trusted service provider** for the major sects which include ARAMCO, SWCC, SABIC, MAADEN, MARAFIQ, SADARA, SATORP, Saudi Cement, Petro Rabigh, Luberef etc.

ETLCO SERVICES

ENVIRONMENTAL CONSULTANCY

We provide expert advisory services, impact assessments, and regulatory compliance solutions to support industries in achieving environmental sustainability.

OIL AND GAS LABORATORY

Equipped with state-of-the-art technology, our lab delivers precise testing and analysis for petroleum, petrochemical, and industrial applications.

AIR QUALITY MONITORING AND TESTING

We offer advanced air quality monitoring and mitigation strategies to help businesses comply with national and international air quality standards.

ENVIRONMENTAL LABORATORY

Our accredited laboratory conducts a wide range of analyses, including water, soil, and microbiological testing, ensuring environmental and public health protection.

Consultancy Department Services

Consultancy Department Services

- Environmental Impact Assessment
- Services Compliant to NCEC Regulation.
- Biodiversity and Ecological Studies
- Environmental Monitoring and Auditing
- Renewable Energy and Clean Technology Consulting
- Marine Surveys and Modelling Studies
- Environmental Hazard and Risk Assessments
- Contaminated Land and Remediation Plan Services
- Waste Management Planning Services
- Offshore and Oilfield Environmental Consulting
- Environmental Policy and Strategy Development

Consultancy Department Services

We offer full impact assessments and Mitigation, development, & monitoring Management plan.

✓ Environmental Impact Assessment

ETLCO excels in conducting comprehensive Environmental Impact Assessments (EIA), Integrating regulatory compliance, risk mitigation, and sustainability principles across Diverse industries. Our methodology encompasses scoping, baseline studies, impact Prediction, mitigation strategies, and regulatory reporting to ensure environmentally Responsible project execution. By aligning with local and global environmental standards. ETLCO's expertise enables proactive risk management, minimizing environmental Liabilities and optimizing long-term project viability.

✓ Services Compliant to NCEC Regulation.

ETLCO ensures compliance with NCEC standards, supporting sustainable project Development through comprehensive Environmental Impact Assessments (EIA). We secure Category I, II, and III permits while aligning with IFC, World Bank ESS, and Equator Principles. Our services integrate NCEC guidelines to minimize ecological impact and ensure regulatory adherence. We provide services to obtain Environmental Permits to Construct (EPC) and Operate (EPO) for seamless project execution.

✓ Biodiversity and Ecological Studies

ETLCO provides comprehensive Biodiversity and Ecological Study Services to help Industries assess, monitor, and manage ecological impacts while ensuring regulatory Compliance. Our key offerings include biodiversity assessments, habitat studies, Ecological risk evaluations, avian studies, and impact mitigation plans. We adhere to NCEC, IUCN, CBD, MEWA, and SWA standards. We support sustainable and responsible Development.

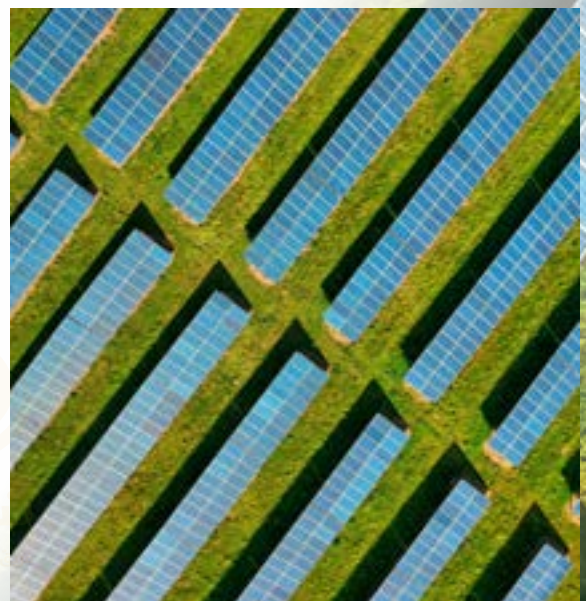

Consultancy Department Services

✓ Environmental Monitoring and Auditing

ETLCO provides comprehensive Environmental Monitoring and Auditing services to ensure regulatory compliance, mitigate risks, and promote sustainability. Our monitoring services cover air, water, soil, noise, and marine ecosystems, while our audits assess regulatory adherence, performance, waste management, and carbon footprint reduction. We comply with NCEC, RCER, ISO, and OSHA standards, we help industries optimize environmental management.

✓ Renewable Energy and Clean Technology Consulting

ETLCO provides expert consulting in renewable energy and clean technology, helping organizations adopt sustainable solutions while ensuring regulatory compliance. Our services include feasibility studies for solar and wind projects, carbon management strategies, and technical consulting for wind energy development. We align projects with Saudi Vision 2030, NCEC, RCER, and international standards like LEED and ISO 50001.

Consultancy Department Services

✓ Marine Surveys and Modelling Studies

ETLCO provides comprehensive marine surveys and advanced modelling studies to assess, monitor, and predict marine environmental conditions for sustainable coastal Development. Our services include marine habitat mapping, water quality monitoring, benthic and sediment surveys, and species population studies to ensure ecosystem health and regulatory compliance. We conduct hydrodynamic, marine transport, and sediment transport assessments, along with ADCP deployment that supports environmental protection, impact reduction, and informed decision-making for marine projects.

✓ Environmental Hazard and Risk Assessments

ETLCO specializes in comprehensive environmental hazard and risk assessments to help businesses identify, mitigate, and manage potential environmental risks that's include HAZID, health and safety hazard analysis, emergency preparedness, risk modeling, and human and ecological risk assessments as per environmental regulations. Using data-driven insights and advanced analysis, we support informed decision-making and effective risk management strategies.

Consultancy Department Services

Contaminated Land and Remediation Plan Services

ETLCO specializes in contaminated land assessment and remediation, ensuring environmental safety, regulatory compliance, and sustainable land use that include site characterization, Phase I & II Environmental Site Assessments (ESA), risk evaluations, feasibility studies, and customized remediation plans. We utilize advanced technologies for soil and groundwater remediation, minimizing environmental impact while restoring land to safe conditions. With a data-driven and regulatory-compliant approach.

Waste Management Planning Services

ETLCO specializes in comprehensive Waste Management Planning Services to ensure responsible waste handling, regulatory compliance, and environmental sustainability that include waste characterization, minimization strategies, segregation systems, disposal planning, and compliance reviews. We help industries develop cost-effective and eco-friendly waste management solutions, reducing environmental impact and improving operational efficiency.

Consultancy Department Services

Offshore and Oilfield Environmental Consulting

ETLCO provides specialized Offshore and Oilfield Environmental Consulting Services to ensure sustainable, compliant, and responsible operations that's includes comprehensive EIAs, baseline environmental studies, regulatory compliance, and oil spill prevention and response planning. We assess environmental risks, develop mitigation strategies, and create emergency response plans that align with local and international regulations.ETLCO helps offshore and oil field industries minimize environmental impact while maintaining operational efficiency.

Environmental Policy and Strategy Development

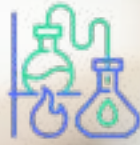

ETLCO specializes in developing tailored environmental policies and strategies to help organizations minimize their environmental footprint, ensure regulatory compliance, drive sustainable growth. Our services include policy development, environmental management systems (EMS), carbon neutrality strategies, regulatory compliance planning, and stakeholder engagement.

Oil & Gas Laboratory

Oil & Gas Laboratory

-  **Lubricating Oil Analysis**
-  **Transformer Oil Analysis**
-  **Crude and Heavy Fuel Oil Analysis**
-  **Diesel and Kerosene Analysis**
-  **Petrol & Light Distillate**
-  **Refinery & Natural Gases**
-  **Grease Analysis**
-  **Asphalt and Bitumen**
-  **Coolant Analysis**

Oil & Gas Laboratory

We offer comprehensive lubricating oil testing to assess physical, chemical, and performance properties, ensuring optimal equipment efficiency and longevity.

✓ Lubricating Oil Analysis

ETLCO offers comprehensive lubricating oil testing to assess physical, chemical, and performance properties, ensuring optimal equipment efficiency and longevity. Our advanced analysis includes tests for viscosity, flash & fire point, oxidation stability, water content, FTIR spectroscopy, total acid/base number, particle count, and ICP-OES spectrochemical analysis. These tests help prevent wear, enhance performance, and ensure compliance with industry standards and more.

✓ Transformer Oil Analysis

ETLCO provides comprehensive transformer oil testing to assess insulation quality, cooling efficiency, and overall transformer health. Our tests include Acid Number, Dielectric Breakdown Voltage, Dissolved Gas Analysis, Dielectric Dissipation Factor, Interfacial Tension, Copper Corrosion, Specific Resistance, Oxidation Stability, Furans by HPLC, and more. These analyses support condition monitoring, fault diagnosis, maintenance planning, and regulatory compliance.

✓ Crude and Heavy Fuel Oil Analysis

ETLCO provides comprehensive crude oil and heavy fuel oil testing to assess quality, safety, and refinery compatibility. Key tests include Ash Content, Asphaltenes, Carbon Residue, Copper Strip Test, Density, API Gravity, Flash & Fire Points, Heating Value, Kinematic Viscosity, Mercaptan Sulfur, Reid Vapor Pressure, Salts, Sulfur by ED-XRF, Total Acid Number, Water & Sediments, and more. These analyses support refining efficiency, yield optimization, and compliance with industry standards.

Oil & Gas Laboratory

✓ Diesel and Kerosene Analysis

ETLCO provides diesel and kerosene testing to ensure quality, performance, and regulatory compliance. Key tests include Ash Content, Boiling Range Distribution, Cetane Number, Cloud Point, Cold Filter Plugging Point, Distillation, Flash & Fire Points, Kinematic Viscosity, Mercaptan Sulfur, Octane Number, Sulfur by ED-XRF, Total Acid Number, Water & Sediments, and more.

✓ Petrol & Light Distillate

ETLCO provides comprehensive testing for petrol, naphtha, and light fuel to ensure quality, performance, and regulatory compliance. Key analyses include Density & API Gravity, Detailed Hydrocarbon Analysis, Distillation, Electrical Conductivity, Flash & Fire Points, Gum Content, Mercaptan Sulfur, Octane Number, Oxygenates, Sulfur by ED-XRF, Water & Sediments, and Water by Karl Fischer and more.

✓ Refinery & Natural Gases

ETLCO provides comprehensive testing for refinery and natural gas to ensure quality, safety, and compliance with environmental standards. Our gas analysis services include Natural Gas Analysis, Reformed Gas Analysis, Sulfur Compounds, Gaseous Fuels, Hydrocarbon & Non-Hydrocarbon Gases, and Hydrocarbons in Petroleum Gases. These tests support quality control, performance monitoring, and regulatory compliance in refinery and gas operations.

Oil & Gas Laboratory

Grease Analysis

ETLCO provides comprehensive lubricating grease analysis to ensure performance, stability, and suitability for various applications. Our testing covers Base Oil Analysis (Evaluates lubrication efficiency and compatibility), Thickener Evaluation (Assesses structure and stability under different conditions), Additive Performance Testing (Determines oxidation resistance, corrosion protection, and anti-wear properties), Consistency Testing (Measures cone penetration for operational suitability), Thermal & Oxidation Stability (Ensures resistance to high temperatures and degradation). The Key tests include Cone Penetration, Copper Corrosion, Dropping Point, Grease Worker, Oil Separation, Oxidation Stability, Ruler (Linear Sweep Voltammetry), and more.

Asphalt and Bitumen

ETLCO provides comprehensive asphalt and bitumen testing to assess physical properties and performance characteristics essential for construction applications. Our key analyses include Bitumen Testing which Evaluates physical properties and chemical composition, Asphalt Performance Testing (Determines durability and suitability for roads and paved surfaces). The Key Parameters are Cone Penetration, Distillation of Cutback Asphalt, Dropping Point, Electrical Conductivity, Flash Point, Mercaptan Sulfur, Say bolt Viscosity, Softening Point, Solubility in Trichloroethylene, and more.

Coolant Analysis

ETLCO offers comprehensive coolant testing to assess performance and condition in automotive, industrial, and HVAC systems. Our analysis ensures optimal heat transfer, corrosion prevention, and temperature regulation. The key Parameters are Appearance, Color, Freezing Point, pH, Conductivity, Boiling Point, and more.

Air Quality Services

Air Quality Services

- Stack Emission Testing
- Ambient Air Quality Monitoring Services
- Indoor Air Quality Monitoring
- Fugitive Emission Monitoring
- Noise Monitoring Services
- Odor Monitoring and Control Services
- Vehicle Exhaust & Heavy Equipment Emission Testing Services
- Industrial Hygiene Air Sampling Services
- Greenhouse Gas (GHG) Monitoring Services
- Air Dispersion Modelling
- Noise Modelling
- Cooling Tower Drift Loss Emission Test
- Environmental Monitoring Equipment Supply, Installation and Maintenance

Air Quality Services

ETLCO owns mobile laboratories for ambient air monitoring applications.

Stack Emission Testing

ETLCO specializes in advanced stack emission testing using state-of-the-art Continuous Emission Monitoring (CEM) analyzers housed in mobile laboratory stations. Since 2009, we have led emission monitoring, ensuring compliance with USEPA, NCEC, and RCER standards. Our expertise covers all regulated pollutants, including SO₂, NO_x, CO, PM₁₀, metals, dioxins, and more. We offer services such as Relative Accuracy Test Audits (RATA), Relative Accuracy Audits (RAA), and Predictive Emission Monitoring System (PEMS) validation.

Ambient Air Quality Monitoring Services

ETLCO provides comprehensive ambient air quality monitoring using USEPA-approved analyzers for real-time, high-precision measurements. Our mobile laboratory stations monitor key pollutants, including NO_x, SO₂, O₃, CO, BTEX, NMHC, and particulate matter (PM_{2.5} & PM₁₀). We utilize High Volume Samplers and real-time dust analyzers. ETLCO ensures compliance with NCEC and RCER standards.

Indoor Air Quality Monitoring

ETLCO specializes in Indoor Air Quality (IAQ) Monitoring using advanced Gray Wolf handheld devices to measure SO₂, NO₂, CO, CO₂, O₃, H₂S, TVOCs, PM_{2.5}, PM₁₀, temperature, and humidity. Our solutions comply with USEPA, IOSH, and OSHA standards, providing real-time data analysis to identify pollutants and validate mitigation strategies. ETLCO ensures healthier indoor environments, regulatory compliance, and enhanced building performance.

Air Quality Services

✓ Fugitive Emission Monitoring

ETLCO offers advanced Fugitive Emission Monitoring (FEMS) services to help industries comply with NCEC and RCER regulations. Using cutting-edge equipment like TVA 1000, TVA 2020, and Optical Gas Imaging (OGI) cameras, we ensure precise detection and monitoring of VOCs and HAPs. Our services include component identification, tagging, master list development, and monitoring, conducted by highly trained engineers following USEPA Method 21. ETLCO's FEMS solutions support effective emission control and regulatory compliance with advanced technology and expert execution.

✓ Noise Monitoring Services

ETLCO provides advanced noise monitoring solutions, leveraging state-of-the-art equipment compliant with national and international standards. Since 2009, we have been a leader in noise monitoring, delivering precise and reliable environmental noise assessments. Our solutions align with regulatory requirements, including NCEC, RC, US EPA, and OSHA, ensuring accurate data collection and reporting. ETLCO specializes in ambient, indoor, and fence-line noise monitoring, utilizing key measurement parameters such as LAeq, L10, L50, L90, L95, LMIN, and LMAX. Our comprehensive noise assessments offer detailed insights for effective environmental noise management and regulatory compliance.

Air Quality Services

Odor Monitoring and Control Services

ETLCO provides comprehensive odor monitoring services using state-of-the-art, approved equipment to accurately measure and assess odorous emissions from industrial facilities, waste landfills, agricultural operations, and more. Since 2009, we have been a trusted leader in odor monitoring, ensuring compliance with regulatory standards, including NCEC, USEPA, OSHA, and RC regulations. Our advanced monitoring solutions detect and quantify key odor parameters, such as Odor Concentration (OU/m^3), Hydrogen Sulfide (H_2S), Ammonia (NH_3), Volatile Organic Compounds (VOCs), and Odor Intensity Levels.

Vehicle Exhaust & Heavy Equipment Emission Testing Services

ETLCO provides reliable vehicle exhaust and heavy equipment emissions testing, ensuring compliance with NCEC, USEPA, and OSHA regulations. Since 2009, we have used cutting-edge technology to measure key pollutants like CO_2 , SO_2 , NO_x , VOCs, and PM from forklifts, AC exhaust systems, vehicles, and heavy machinery. Our services help clients meet regulatory standards, optimize performance, and reduce environmental impact.

Air Quality Services

Industrial Hygiene Air Sampling Services

ETLCO provides industrial hygiene air sampling services to ensure compliance with NCEC, NIOSH, OSHA, and RC regulations. Since 2009, we have used advanced equipment to monitor pollutants like CO₂, NO_x, SO₂, VOCs, PM, and microbiological contaminants (bacteria & fungi). Our precise air quality assessments help protect worker health and maintain regulatory compliance.

Greenhouse Gas (GHG) Monitoring Services

ETLCO provides advanced Greenhouse Gas (GHG) monitoring services to ensure compliance with NCEC, USEPA, OSHA, and RC regulations. Since 2009, we have utilized state-of-the-art equipment to accurately quantify emissions of CO₂, CH₄, N₂O, HFCs, PFCs, SF₆, NF₃, and VOCs. Our precise data collection supports regulatory compliance, emission reduction strategies, and sustainability goals.

Air Dispersion Modelling

ETLCO provides expert Air Dispersion Modelling Services to predict and analyze the movement of airborne pollutants, ensuring compliance with NCEC, US EPA, and RC regulations. Using advanced software and methodologies, we assess pollutant concentration, weather impact, regulatory compliance, and health risks. Our services support industries in optimizing emissions control, minimizing environmental impact, and maintaining regulatory compliance.

Air Quality Services

✓ Noise Modelling

ETLCO provides expert Noise Modelling Services to predict and assess noise propagation from industrial, transportation, and construction sources. Using advanced software and methodologies, we ensure compliance with NCEC, USEPA, and RC regulations. Our services analyze noise dispersion, environmental impact, regulatory compliance, and mitigation strategies, helping industries minimize noise pollution and meet environmental standards.

✓ Cooling Tower Drift Loss Emission Test

The Cooling Tower Drift Loss Emission Test measures the amount of water droplets (drift) escaping from a cooling tower, helping to prevent water and chemical loss, protect the environment, and maintain efficiency. Using specialized instruments like drift samplers and pH meters, the test evaluates drift rate, dissolved solids, and chemical content, following standards such as ISO 2060. Regulatory bodies like RCJY and NCEC enforce strict limits on drift loss and chemical discharge to ensure compliance and sustainability, keeping emissions minimal ($\leq 0.002\%$ – 0.0005%).

✓ Environmental Monitoring Equipment Supply, Installation and Maintenance

ETLCO supplies, installs, and maintains environmental monitoring equipment, ensuring compliance with NCEC, RC, and USEPA standards. Our offerings include Air Quality Monitors (Real-time CO₂, NO_x, SO₂, PM, and VOC detection). Noise Meters (Measure LAeq, L10, L50, L90, L95 for compliance). Odor Sensors (Detect H₂S, NH₃, and VOCs).

Environmental Laboratory

Environmental Laboratory

Field Sampling Services

Water Quality Testing

Soil Testing and Analysis

Organic Pollutants Testing

Hazardous Waste Testing & Characterization

Metallic Constituent Analysis

Microbiological Testing

Environmental Laboratory

ETLCO is equipped with the latest laboratory and sampling equipment to satisfy the ever-demanding needs for analytical precision

Field Sampling Services

ETLCO provides efficient pickup and sampling services, ensuring timely and precise field support. Our trained staff coordinates closely with Project in charge and Sample Coordinators for seamless execution. Our services include Groundwater & Dewatering Well Sampling, Surface Water & Wastewater Sampling, Soil, Sludge, Sediment & Hazardous Waste Sampling & Drinking Water & Seawater Sampling.

Water Quality Testing

ETLCO offers comprehensive water quality testing services to assess the chemical, physical, and biological characteristics of water, wastewater, groundwater, and seawater. Our testing ensures compliance with environmental regulations and supports industrial, agricultural, and drinking water applications. We analyze key parameters, including pH, turbidity, DO, BOD, COD, TDS, nitrates, phosphates, chlorides, heavy metals, VOCs, SVOCs, TPH, THMs, pesticides, and microbial contaminants.

Environmental Laboratory

✓ Soil Testing and Analysis

ETLCO provides comprehensive soil sampling and analysis services to assess soil quality, contamination levels, and suitability for various applications. Our services support environmental management, regulatory compliance, land and agriculture development. We analyze key parameters such as pH, organic matter, TOC, nitrogen (N), phosphorus (P), potassium (K), heavy metals, salinity, moisture content, and cation exchange capacity (CEC). These assessments enable informed decision-making for soil management, crop production, and environmental protection.

✓ Organic Pollutants Testing

ETLCO specializes in advanced testing for harmful organic compounds that impact health and ecosystems due to their persistence in the environment. Our laboratory conducts high-precision analysis, including Tentatively Identified Compounds (TIC) using VOC and SVOC library searches on GC-MS systems. We follow EPA SW-846 Methods 8260, 8270, and 8015 for VOC, SVOC, and non-halogenated organics, along with TPH analysis as per US EPA guidelines for water, soil, and solids. Using state-of-the-art GC-MS/P&T and GC-FID/HS instruments with auto samplers, we provide rapid, high-quality results. Key tests include TOC, TCH, THMs, BTEX, phenols, pesticides, PCBs, herbicides, VOCs, SVOCs, organic solvents, and TPH (aggregate and fractionated).

✓ Hazardous Waste Testing & Characterization

Hazardous waste testing is essential for determining the chemical composition and toxicity of waste materials to ensure proper classification, handling, and disposal, minimizing environmental impact and maintaining regulatory compliance. **ETLCO** provides waste characterization analyses compliant with RCER2015 and EPA standards, employing USEPA SW-846 methods and EPA water matrix protocols. Key tests include TCLP (Toxicity Characteristic Leaching Procedure), assessments of corrosivity, reactivity, ignitability, and analyses for VOCs, heavy metals, and pesticides etc.

شركة دوائر

Environmental Testing and Laboratories Company

Environmental Laboratory

✓ Metallic Constituent Analysis

ETLCO provides precise metals analysis across water, wastewater, sludge, and solid matrices for municipal, commercial, and industrial sectors. Our experienced team utilizes state-of-the-art ICP-MS, ICP-OES, and ICP-OES with a Hydrogen Generation Kit, following US EPA, APHA, and ASTM methodologies. Key methods include ICP-MS (Inductively Coupled Plasma Mass Spectrometry): EPA 200.8, APHA 3125, EPA 6020 (SW-846), ICP-OES (Inductively Coupled Plasma Optical Emission Spectrometry) EPA 200.7, APHA 3120, EPA 6010 (SW-846), ICP-OES with Hydride Generation Kit: Mercury analysis

✓ Microbiological Testing

ETLCO provides comprehensive microbiological testing to detect and quantify microbial contaminants in water, soil, and air. Our analysis cover key parameters, including total coliforms, E. coli, fecal coliforms, total plate count, Legionella, and pathogenic bacteria. These tests help ensure environmental safety, regulatory compliance, and public health protection.
